

ORGANIC AND ORGANO-MINERAL
AMINOFERT N 5%
FLUID ORGANIC NITROGENOUS FERTILIZER
Mixture of organic nitrogenous fertilizers

COMPOSITION

TOTAL AVAILABLE ORGANIC NITROGEN (N): 5%
ORGANIC CARBON (C) of biological origin: 15%
AUTHORIZED IN ORGANIC FARMING

Organic fertilizers: for at least 21 days after the application it is forbidden to feed livestock with pasture grasses, or distributed after harvest

FEATURES

AMINOFERT N 5% is a combination of animal and plant extracts.

The concentration obtained with amino acids, animal and vegetable proteins and natural auxins is extremely high but it maintains a balanced proportionality between the components and the vegetative needs.

The use of AMINOFERT N 5% allows a regular and harmonious development of the plant, even in unfavorable environmental conditions.

The absence of inorganic chemical elements protects by the increasing of the salinity and promotes the binding in complexes of the inorganic elements in the soil.

DOSES AND USE PATTERNS

FOLIAR TREATMENTS:

Fruit picking: 3 kg per hectare, Viticulture: 2-2,5 kg per hectare, Horticulture: 1,5 kg per hectare, Woody ornamental plants and shrubs: 2 kg per hectare, Herbaceous ornamental plants: 0,8-1 kg per hectare.

FERTIGATION:

Horticulture: 10-15 kg per 1000 m², first treatment after the transplantation or at the vegetative development, then treat every 15-20 days.

Chicory, lettuce, salad: 10-12 kg per 1000 m² after the transplantation, repeat the treatment after 15 days. Tobacco: 15-20 kg after the transplantation, repeat the treatment 2 times at a distance of 20 days. Fruit picking: 3 treatments with 10-15 kg per 1000 m²: the first after the transplantation, the second in pre-flowering and the third near the harvest. Fruit picking: 25-30 kg during the fruit-setting and 20-25 kg during the development of the fruit.

The doses may be distributed into several treatments at a distance of 15-20 days.

PACKING: 12-30 KG CANS, 250 KG DRUMS, 1250 KG TANKS.
