

FERTILIZER TREATMENTS IN CASE OF EMERGENCY

IDROSUN

ORGANIC NITROGENOUS FERTILIZER

Meat meal with microelements

COMPOSITION

TOTAL AVAILABLE ORGANIC NITROGEN (N) 6,7%
BORON (B) water soluble: 0,04%
COPPER (Cu) water soluble: 0,02% chelated with EDTA
IRON (Fe) water soluble: 0,5% chelated with EDTA
MANGANESE (Mn) water soluble: 0,25% chelated with EDTA
MOLYBDENUM (Mo) water soluble: 0,002%
ZINC (Zn) water soluble: 0,04% chelated with EDTA
AUTHORIZED IN ORGANIC FARMING

Organic fertilizers: for at least 21 days after the application it is forbidden to feed livestock with pasture grasses, or distributed after harvest

FEATURES

IDROSUN is a foliar fertilizer with a rapid assimilation that increases the photosynthetic capacity, the quantity of leaves, the thickness of the mesophyll. It slows the physiological death of the older leaves, it restores the biological potentialities of the leaves after a hailstorm, a parasite attack and it fights against stresses caused by failure of water or strong wind and the consequent appearance of phyllptosis.

The product penetrate also when leaves are adult.

DOSES AND USE PATTERNS

The better results are obtained with regular treatments and small doses.

WARNING: the product has to be hydrated 8 hours before the treatment with 6-7 liters of water.

After, add 3 liters of Acidulen. The solution is ready when you can see the formation of a foam.

FOLIAR TREATMENTS: Fruit picking, viticulture, forestry: 2-3 kg per hectare

Horticulture, industrial crops and forage crops: 1-1,5 kg per hectare

Floriculture: 1-1,2 kg per hectare

FERTIGATION: Fruit picking: 1 kg per 1000 m²

Horticulture: 600 grams per 1000 m²

PACKING: 2 KG BAGS - BOXES OF 5 PIECES.
