

SUNDOR

CE FERTILIZER SOLUTION OF CALCIUM CHLORIDE

COMPOSITION

CALCIUM OXIDE (CaO) water soluble: 12%
RAW MATERIALS: solution of calcium chloride
AUTHORIZED IN ORGANIC FARMING

The product is stable at ordinary temperatures and pressures. Preserve between 5° and 25°C. The product is not combustible.

FEATURES

SUNDOR is studied to reinforce mechanically and biologically the wintering bud through an induced resistance on the bud scale and on the herbaceous tissues that have grown during the year. The product properly lignifies the vegetation and reduces the vigor excess, even during the vegetative phase in spring.

DOSES AND USE PATTERNS

FOLIAR TREATMENTS:

Woody plants: 2-5 kg per hectare

Herbaceous plants: 1-3 kg per hectare

FERTIGATION:

Woody plants: 10-20 kg per hectare

Herbaceous plants: 5-10 kg per hectare

Shake before use.

PACKING: 1 KG BOTTLES, 5 KG CANS.
